

Student Digital Portfolio & Cyber-Awareness Project

AI/ML Canva GitHub Google Drive

Student Name: Vaibhav Naikwade

Registration No: 25BAI10507

Course: B.Tech CSE (AI & ML), 1st Year

Institution: VIT Bhopal University

Project Overview

This repository is a comprehensive compilation of five modules focused on establishing a professional digital presence, mastering collaboration tools, and understanding modern cybersecurity challenges. As a first-year AI & ML student, this project bridges the gap between academic theory and professional industry standards.

Repository Structure

Folder Content Description

task-1-presentation/ Digital Literacy Infographic (Canva)

task-2-portfolio/ Screenshots of GitHub, LinkedIn, and Kaggle profiles

task-3-platforms/ Google Form Quiz and Response Sheet evidence

task-4-email-etiquette/ Professional email drafts and Social Media Checklist

task-5-cybercrime/ Case Study (UPI Fraud) and Prevention Checklist

Module Summaries

1. Digital Literacy Awareness

Goal: Create a visual resource to help batchmates navigate the digital landscape.

Tool Used: Canva.

Focus: Core pillars of digital literacy, essential engineering software, and safe internet practices.

Insight: Balancing visual design with technical information density was the primary focus.

3. Professional Identity

Platforms: GitHub (Code/Projects), LinkedIn (Networking), Kaggle (Data Science).

Strategy: Using these platforms over the next four years to showcase AI/ML projects and connect with industry leaders.

4. Google Workspace Collaboration

Built: A 5-question "Digital Literacy Awareness Quiz."

Outcome: Practiced data collection and analysis workflows by linking Google Forms to Google Sheets for real-time monitoring—a skill vital for future AI/ML research.

5. Professional Communication

Email Etiquette: Drafted formal correspondence for academic extensions and internship inquiries.

Social Media: Developed a "Do's and Don'ts" checklist to maintain a professional digital footprint for future recruiters.

Key Lesson: Learned "inbox mindfulness" to avoid communication errors in professional settings.

6. Cybercrime & Prevention

Case Study: Researched UPI Payment Fraud (QR Code Scams) through a narrative scenario.

Prevention: Compiled 8 actionable tips to stay safe online in India, including reporting protocols via 1930 and [cybercrime.gov.in](https://www.cybercrime.gov.in).

Insight: Realized that "Social Engineering" is often a greater threat than technical hacking.

Stay Safe Online

One of the most critical takeaways from this project is that your UPI PIN is only for sending money, never for receiving it. Always verify links and use two-factor authentication (2FA) on all academic and personal accounts.
